Training Track:

Optical LAN Planning & Design

SKU: SL40-NPD3836-OS
Category:

Optical LAN Network, Planning and Design Training (On-Site)

This instructor-led course provides knowledge and skills needed to plan and design a network for a Tellabs Optical LAN system.
After an introduction to the Tellabs Optical LAN system and hardware functionality, students will learn how to design the system to provide the data and voice services and applications supported by Tellabs Optical LAN.
This course includes hands-on activities. It is designed to help students learn the concepts that have been presented and reinforce what they have learned.
This course is delivered at the customer site.
Valid for US-based classes only; up to 8 students.
