Training Track:

Optical LAN Deployment

SKU: SL40-ODCERT
Category:

Optical LAN Deployment Certification (Class)

This instructor-led course provides the knowledge and skills required to properly install, turn up, configure, and test a Tellabs Optical LAN system. It is a 5-day lab-intensive program that has been designed to prepare the certification candidate with the tools needed for a successful completion of the *Tellabs 1100 Optical LAN Deployment Certification Test* (SL40-ODTEST). This class is delivered via a combination of instructor lecture and instructor-guided lab activities. Following instructor demonstrations, students will practice:

- Installing Tellabs Optical LAN OLT and ONT equipment
- Commissioning of the Optical LAN equipment and Panorama EMS
- Performing acceptance testing and troubleshooting of the Optical LAN equipment

The class is delivered at the Tellabs Training Center in Dallas, TX.
