Training Track:

Optical LAN Deployment

SKU: SL40-ODRECERT
Category:

Optical LAN Deployment Certification Training (Re-test)

The Tellabs Optical LAN Deployment Certification test is an online examination that evaluates the knowledge required to be certified in Tellabs OLAN Deployment. The test is administered securely online using the ProctorU testing services. This is a retest for individuals that have either failed their initial examination or their certification has expired.

Certification is valid for 2 years after successfully passing this exam.
