Training Track:

Optical LAN Deployment

SKU: SL40-ODCERT
Category:

Optical LAN Deployment Certification (Class)

This instructor-led course provides the knowledge and skills required to properly install, turn up, configure, and test a Tellabs Optical LAN system. It is a 5-day lab-intensive program that has been designed to prepare the certification candidate with the tools needed for a successful completion of the *Tellabs 1100 Optical LAN Deployment Certification Test* (SL40-ODTEST). This class is delivered via a combination of instructor lecture and instructor-guided lab activities. Following instructor demonstrations, students will practice:

•Installing Tellabs Optical LAN OLT and ONT equipment
•Commissioning of the Optical LAN equipment and Panorama EMS
•Performing acceptance testing and troubleshooting of the Optical LAN equipment

The class is delivered at the Tellabs Training Center in Dallas, TX.
