Training Track:

Optical LAN Operations

SKU: SL40-OPM3838-OS
Category:

Optical LAN Operations, Provisioning and Maintenance (On-Site)

This instructor-led course provides knowledge and skills needed to operate, provision, and maintain a Tellabs Optical LAN system using the Tellabs Panorama Element Management System (EMS).

After an introduction to the Tellabs 1150/1134 Optical LAN system and hardware functionality, students will learn how to provision the system to provide the voice, data, and video services and applications supported by the Tellabs Optical LAN system. Students will also learn tools and procedures for monitoring and maintaining the system.

This course includes hands-on activities using a Tellabs training lab equipment. It is designed to help students learn the concepts that have been presented and reinforce what they have learned.
