Training Track:

Fiber Optic Technician

SKU: SL40-CFOT-C
Category:

Fiber Optic Installation Training (Class)

This instructor-led course provides the knowledge and skills needed to install, splice, 'connectorize', and troubleshoot fiber optics. In addition, students will learn to confirm, test, and document the fiber optic installation.
This course includes hands-on activities using training lab equipment, tools, and materials. It is designed to help students learn the concepts that have been presented and reinforce what they have learned.
Participants completing the course exercises and lab requirements will be given the Fiber Optic Association (FOA) exam for Certified Fiber Optic Technicians. This exam is proctored by the certified FOA instructor and participants must score the minimum (70%) to meet the FOA certification requirements.
This course is delivered at the Tellabs Training Center in Dallas, TX.
